

What's new in EverBatt 2020?

Major expansions and updates in EverBatt 2020 include

- 1) the addition of battery pack manufacturing;
- 2) the addition of battery pack and module disassembly;
- 3) the addition of $\text{LiNi}_{0.5}\text{Mn}_{0.3}\text{Co}_{0.2}\text{O}_2$ (NMC532) as a new cathode chemistry, including NMC532 battery manufacturing and recycling, and NMC532 cathode powder production;
- 4) a refined logistics module that separates packaging cost from transportation cost and accounts for the impact of truck payload on transportation cost;
- 5) a refined direct recycling process, and data updates for hydrometallurgical and pyrometallurgical processes;
- 6) background data updates based on BatPaC 4.0, GREET 2020, and most recent prices for materials and utilities.

Minor updates and changes in EverBatt 2020 include

- 1) separating binder into cathode binder and anode binder and adding calculation of fluorine content in recycled batteries;
- 2) changing model interface/layout to improve ease of use;
- 3) fixing identified bugs and errors.
